

DIMENSIONS: 410mm x 505mm x 495mm

Overview: The Tardis 2" Diesel water pump is a self-priming centrifugal drainage pump which is powered by a compact Subaru Robin Diesel engine

Hose couplings, washers, clips and strainers are supplied with all pumps but hoses are extra.

****Please note these are not suitable to be used to feed pressure washers, any damage sustained as a result will be chargeable****

Main Features

Subaru Robin DY23 – 2D Diesel engine
Inlet / Outlet: 50mm
Flow: 600 litres per minute
Head: 28 m
Solids: 7m
Weight 40Kg
Max suction lift: 8 metres though 6 metres or less is recommended

Ideal for use on construction sites as pump can handle dirty water
