

Dimensions: 2100mm Wide x 3000mm Long x 485mm High

Main Features

- Built in lifting handles and sling points
- Sloped upper surfaces to drain off rainwater
- Sealed access ports protect against spillage and odour
- Increase volume points by linking several tanks together to extend the period between waste tank empties.
- Linkable in two directions: side-to-side, nose-to-trail.
- Stackable
- Volume: 2270 litres / 500 gallons
- Weight when empty: 110 kg

All tanks are subject to availability, and bespoke tanks can be made upon request. Square tanks need to be buried at MID LEVEL.

If you need a tank to be fully buried. Please let us know your specific requirements when ordering so we can supply you with the most suitable tank.

Features 2 x 4" pipework connection points and 2 x 12" disposal points.

Applications:

- Construction sites
- Events / Campsites
- Any other instances where there is no mains sewer connection

Plastic tanks linked side-to-side

Sited below a toilet block trailer

We do not recommend plastic waste tanks are sited underground
