

Dimensions – 1167mm long x 1167mm wide x 1476mm high

This 800 litre clean water Conical tank is ideal for clean water supply on site. It can be lifted and moved on site via forklift or crane with tested lifting points to be moved full. Tank outlet is at the bottom of the tank so can be used with gravity or with a booster pump if providing to welfare facilities. Fully sealed and UV protected to protect water quality. Choice of two outlets being 2" male snap lock or 25mm MDPE connection.

These tanks can also be used for drinking water if required. If they are to be used for drinking water, the water must come from a suitable supply and the relevant testing and implementation must be followed

Key Features

- 800 litre capacity.
- Drinking water capable.
- Can be delivered full.
- UV protected.
- 2" male snap lock outlet or 25mm MDPE connection.
- Can be used with a powerful on demand water pump.
