

Dimensions: 1213mm Long x 1213mm Wide x 1410mm High

DESCRIPTION: This UN approved 950 litre White Diesel poly cube is secure, lightweight and as it is made from Polyethylene, it will result in rust free fuel. It is available with a single diaphragm hand pump or a 12v electric pump. It has two sets of generator feeds to run two units at the same time while the lid is locked. The tank comes complete with a contents gauge.

OUTER BUND TANK: Corrosion free, robust, heavy duty Polyethylene outer bund tank.

INNER FUEL TANK: Corrosion free, robust, heavy duty Polyethylene inner tank to prevent fuel contamination. Moulded in trigger nozzle storage. 2" filler cap. Contents gauge. Pressure relief valve. 1" manual vent valve fitted. Fittings to run two generators simultaneously with the lid locked.

FRAME: Galvanised 5mm steel frame c/w built in fork sockets on all sides. Four corner lifting eyes. Gas strut assisted secure lockable steel access lid.

OPTIONAL PUMP: 12v pump or single diaphragm hand pump. Either pump comes complete with suction pipe c/w ball valve, in line 'Y' strainer, 15' length of 1" diesel hose and trigger nozzle.

Technical Specifications

- Brimful Capacity: 985 Litre
- Unladen Weight 290kg
- Laden Weight 1100kg

We cannot confirm from previous use if the tank has previously held white or red diesel.
