

DustLayer

Self-contained, mobile dust suppression unit for controlling localised dust emissions on sites where power and water are not close by.

- Powerful mist-throwing nozzles
- Integrated 1,100 litre water tank
- Folding, rotatable, extendable mast
- Mobile, trailer-mounted design

• Optional roadway sprayer feature

3 x high-pressure mist-throwing nozzles

450 mm screw lid and centre 100 mm vented fill cap, with lockable access cover

Hot-dip galvanised steel chassis to highway-specification with rear lights, mudguards and rubber suspension

Adjustable support leg

Total width: 1.65 m

DustLayer Eco

110 V

110 V starter panel with 32 A appliance inlet
Requires 240 V 16 A power supply socket
24/7 operation

DustLayer Eco+

Battery

Built-in battery charger (requires 240 V 13 A socket)

2x built-in batteries provide around 6.5 hours of continuous operation
Option of 2x additional batteries provide around 12 hours of continuous operation

DustLayer

Diesel/HVO

4.7 litre diesel/HVO fuel tank provides around 8 hours of continuous operation

Electric engine start for easy operation

different power options are available

If a 110 V, 32 A power supply with a motor-rated MCB is not available (NB: a 110 V site transformer with thermal cut-out will not work), then we can offer a 5 kVA transformer complete with motor-rated MCB. This transformer will require a 240 V, 16 A power supply socket.

Spraybar option for roadway spraying available on all models

Choice of two ball hitches available on all models

50 mm ball hitch

40 mm ring hitch
