Visit www.tardish20.co.uk to review our range of drinking water vessels.

The surface in which the iso tanks are to be situated must be able to sustain the weight of the iso tank when full. Please bare in mind iso tanks when full of liquid range from 27 ton up to 35 ton based on the iso tank size requested

Please be advised that tarmac may allow the tank to sink in hot weather conditions, It is also advised that iso tanks are not situated on ground that can become soft when wet. (for example after rainfall.)
