- Honda GX160 petrol engine
- Weight fully loaded 8500kgs
- Capacity – 7000 litres
- 40mm towing eye.
- Heavy duty jack leg
- Ratchet system handbrake

Product Overview

Perfect for large areas of bulk area dust suppression, holding larger quantities than your standard dust suppression bowsers. Ideally designed to be towed with the larger plant machinery on site such as forklifts, dumpers and much more. Can also be used for movement of bulk water on site.

******The pumps used with these aren't compatible with E10 petrol and must be used with E5 petrol (super grade fuel) only** Any call outs in relation to this will be chargeable to the customer, as we would need to drain and replenish each engine with new Super unleaded to run correctly******
