

**Dimensions (WxLxH) MM – 1600 x 3700 x 1350**

**\*\*During freezing conditions the pump must be drained to avoid damage. Please ensure pressure washers are not kept outside and exposed to the elements during the cold winter weather as this will cause damage\*\***

**Product Overview**

Ideal application for mobile pressure washing on the move. The 1125 tank capacity allows long durations of washing time and the 3000psi Pramac pressure washer allows great pressure. The trailer is highway towable. The diesel engine is electric start or alternatively is supplied with a pull chord if required.

**to be used with a towing pin**

**Technical Spec**

- 1125L tank water capacity
- 3000PSI Pramac diesel pressure washer
- 9m length of hose standard (more possible on request)
  - Trailer comes with towing eye as standard
- Filter supplied to protect engine along with drain of valve
- Electric start engine (ignition must be turned off when not in use)
- KFG30 towing hitch and braking system (3000kg)

**Please ensure maintenance is carried out during your hire period to ensure good running of the bowser and engine. Ignition must be turned off when not in use.**

**This unit must be frost protected in winter months and engine drained of water.**
