

**Camera Head Size:** 50mm

**Pipe Diameter:** from 100mm up to 300mm (4"-12")

**Reel Length:** 80 Metres

**Pushrod Diameter:** 15mm

**Lighting:** 12 x High Intensity Rampable LED

Our push rod drainage camera is designed for heavy duty applications where long pushes are required. The reel comes with 4" and 6" skids and 9" roller skid making it ideal for use in 6" to 12" pipework

#### Typical faults found in sewage systems

- Fractures to the pipe structure
- Infiltration
- Grease build up
- Silt build up
- Root infestation
- Broken pipe
- Displaced joints
- Builders rubble
- Open joints

#### Reel Features

- Robust powder created steel frame
- Large pneumatic tyres
- Self lubricating shaft bearings
- Easy to manoeuvre across difficult terrain
- Built in digital meterage

#### Camera Features

- Self levelling
- High resolution camera module
- 4mm sapphire lens, toughened outer lens
- Rugged stainless steel construction
- Integrated high intensity LED light source
