

DIMENSIONS: 251 cm LONG x 49.5 cm WIDE x 30 cm DEEP

Tardis drip trays are constructed from 4mm steel plate and are dye pen tested for leaks as part of the quality build.

Used to keep areas clean by placing items that may leak contents as oil or contaminated water.

When full, the contents can be tankered away.

Capacity: 600 litres

Hinged lifting points x 4

Rigid steel construction.

Built to support the weight of filled barrels
