

Dimensions: 500mm Wide x 310mm Deep x 520mm High

Main Features

- This box is designed to house our smaller electric on demand pumps to protect them during cold and wet weather.
- The box offers protection from freezing whilst allowing ventilation to the pump motor.
- An electrical connection lead is included, 110v or 240v to suit your requirement.
- NB: It is advisable to lag the exposed water pipework to protect freezing.

Unit colours may vary

Pump hired separately

We hire a comprehensive range of **diesel, petrol and electric pumps** for a variety of uses including submersible pumps which are ideal for clearing flood water in domestic situations.

A frozen pump can be an expensive problem as frozen water expands and can cause damage to internal workings.
