

Dimensions: 1000mm Wide x 1200mm Long x 1160mm High

Main Features: IBC - Tote Tank Insulated Jacket

❑ Outer Surfaces:

- C-L Polyethylene
- A rugged cross laminated sheet
- light in weight tear and fire resistant
- Anti-toxic
- Impervious to bacteria
- Will withstand -35° to +75°C.

❑ Inner Thermal Wadding:

Ref: No. BTB280. This has a CLO (warmth) factor equal to 2.00 or the same as the standard BSI 0.407m2.K/W. (9.5TOG)

BTB280 = heat loss approx ¼ °C per hour if filled at ambient, after 12 hours increases to ½ °C per hour

❑ Standard Fittings:

Two flaps fitted with Velcro to close the inlet and outlet. One centred in the top and one in the centre of the bottom on the narrowest side.

- ❑ Colour silver designed to reflect sunlight and keep the inside cool.

Suitable for:

- ❑ Welfare units
- ❑ Construction sites
- ❑ Events and festivals

Tanks supplied for **clean water storage** have not been qualified pre-treated as per drinking water standards, but are cleaned and prepared to a high standard.

IBC Jackets also protect the IBC from direct sunlight and UV rays that accelerate algae growth in the summer months.
